### 1. Nature of operations and going concern

Prosper Gold Corp. ("Prosper" or the "Company") was incorporated under the *Business Corporations Act* (Ontario) on October 11, 2007, continued into British Columbia under the *Business Corporations Act* (British Columbia) and changed its name from Lander Energy Corporation on April 26, 2012. The registered office of the Company is located at 468 B Reid Street, Quesnel, British Columbia, V2J 2M6. Effective September 3, 2013, the Company's common shares are listed on the TSX Venture Exchange (the "Exchange"), trading under the symbol "PGX" upon completion of its Qualifying Transaction on August 30, 2013. Prior to September 3, 2013, the Company was classified as a capital pool company ("CPC") as defined under Policy 2.4 of the Exchange, and trading on the NEX board of the Exchange under the symbol "PGX-H".

The principal business activity of the Company is the acquisition, exploration and development of mineral properties. These financial statements have been prepared on a going concern basis, which assumes that the Company will continue in operation in the foreseeable future and will be able to realize its assets and settle its liabilities in the normal course of business. The Company has not yet generated any revenues, has incurred losses and negative cash flows from operations since inception and has a deficit of \$14,054,882 as at April 30, 2019 (October 31, 2018 - \$13,310,335). At April 30, 2019, the Company had cash of \$29,790 (October 31, 2018- \$29,790) and working capital deficit of \$512,536 (October 31, 2018 – working capital deficit of \$463,968). The ability of the Company to continue as a going concern over a longer term is dependent on the Company's ability to complete financing to meet administrative overhead and to complete the exploration and development of its mineral property interests, or attainment of profitable mining operations or the receipt of proceeds from the disposition of its mineral property interests. However, there is no guarantee that the Company will establish economically recoverable reserves, profitable operations or positive cash flows from operations. The Company will continue to raise funding through equity financing to continue operations and has been successful to date, but there can be no assurance that adequate financing will be available in the future, or available on terms acceptable to the Company and, therefore, a material uncertainty exists that casts significant doubt over the Company's ability to continue as a going concern.

These financial statements do not include any adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

### 2. Basis of preparation

#### (a) Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards 34, Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board ("IASB"). Accordingly, these condensed interim financial statements do not include all the information and disclosures required by International Financial Reporting Standards ("IFRS") for annual financial statements, and should be read in conjunction with the Company's audited financial statements for the year ended October 31, 2018, which have been prepared in accordance with IFRS.

#### (b) Basis of presentation

These financial statements have been prepared on a historical cost basis, except for certain financial instruments, which are recorded at fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The Company's interim results are not necessarily indicative of its results for the full year.

#### (c) Presentation and functional currency

The presentation and functional currency of the Company is the Canadian dollar. All amounts in these financial statements are expressed in Canadian dollars, unless otherwise indicated.

## 2. Basis of preparation (continued)

### (d) Critical accounting judgments and estimates

The preparation of financial statements in accordance with IFRS requires management to make certain critical accounting estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the accompanying disclosures. Actual results could differ from these judgments and estimates. Estimates and underlying assumptions are reviewed on an ongoing basis based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The impacts of changes to estimates are recognized in the period estimates are revised and in future periods affected. The critical judgment and assumptions applied in the preparation of these condensed interim financial statements and other major sources of measurement uncertainty are consistent with those applied and disclosed in the Company's audited financial statements for the year ended October 31, 2018.

## 3. Significant accounting policies

The significant accounting policies applied in the preparation of these condensed interim financial statements are consistent with those applied and disclosed in the Company's audited financial statements for the year ended October 31, 2018.

## 4. Accounting standards not yet effective

### IFRS 16 Leases

Earlier application permitted for entities that also apply IFRS 15 *Revenue from Contracts with Customers*.

This new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both the lessee and the lessor. The new standard introduces a single lessee accounting model that requires the recognition of all assets and liabilities arising from a lease.

The main features of the new standard are as follows:

- An entity identifies as a lease a contract that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.
- A lessee recognizes an asset representing the right to use the leased asset, and a liability for its obligation to make lease payments. Exceptions are permitted for short-term leases and leases of low-value assets.
- A lease asset is initially measured at cost, and is then depreciated similarly to property, plant and equipment. A lease liability is initially measured at the present value of the unpaid lease payments.
- A lessee presents interest expense on a lease liability separately from depreciation of a lease asset in the statement of profit or loss and other comprehensive income.
- A lessor continues to classify its leases as operating leases or finance leases, and to account for them accordingly.
- A lessor provides enhanced disclosures about its risk exposure, particularly exposure to residual-value risk.

The new standard supersedes the requirements in IAS 17 *Leases*, IFRIC 4 *Determining whether an Arrangement contains a Lease*, SIC-15 *Operating Leases – Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*.

This standard is effective for the Company's annual period beginning on November 1, 2019. Management is currently assessing the impact of the application of IFRS 16 on the Company's financial statements.

## 5. Reclamation deposit

The Company was required to post a security deposit of \$190,000 in favor of the Ministry of Energy and Mines of British Columbia prior to commencement of surface work at the Star Project. A security deposit for this amount was posted with a Canadian financial institution and bears interest at 0.5%.

The total fair value of the incentive options was calculated using the Black-Scholes option pricing model with the following weighted average assumptions and inputs:

	April 30, 2019	April 30, 2018
Risk-free interest rate	1.90%	1.17%
Expected volatility	107%	110%
Expected life	3.13 years	2.25 years
Expected dividend yield	-	-
Share price	\$ 0.10	\$ 0.22
Exercise price	\$ 0.15	\$ 0.24
Expected forfeitures	0.00%	0.00%

Expected stock price volatility was derived from an average volatility based on historical movements in the closing prices of comparable companies' stock for a length of time equal to the expected life of the options.

#### 10. Financial instruments

The Company's financial instruments consist of cash, amounts receivable (other than GST receivable), deposit, reclamation deposit and accounts payable and accrued liabilities. The Company's cash, amounts receivable (other than GST receivable) and deposit are classified as loans and receivables; and the reclamation deposit is classified as held-to-maturity. The Company's accounts payable and accrued liabilities are classified as other financial liabilities.

The fair values of the Company's cash, amounts receivable (other than GST receivable), deposit and accounts payable and accrued liabilities approximate their carrying amounts due to the short-term maturities of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, interest rate risk and foreign currency risk.

##### (a) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge its obligation and cause the other party to incur a financial loss. The Company considers its exposure to credit risk to be low, as its cash, deposit and reclamation deposit are deposited with a large financial institution with a strong credit rating. Amounts receivable consists of GST receivable and credits on vendor payable balances.

##### (b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet obligations associated with its financial instruments. ##### (c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Floating interest earned on the Company's cash balances are considered to be at market interest rates. The deposit of \$2,582 (October 31, 2018 - \$5,481) earns no interest and is deposited with a major bank for the Company's corporate credit card. Assuming that all variables remain constant, a change representing a 1% increase or decrease in the interest rate would not have a significant effect for the Company.
