

PROSPER GOLD CORP.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE SIX MONTHS ENDED APRIL 30, 2020

1.1 DATE

This management's discussion and analysis ("MD&A") of the financial condition and operating results of Prosper Gold Corp. (Prosper Gold or the Company) for the six months ended April 30, 2020 is derived from, and should be read in conjunction with, Prosper Gold's unaudited financial statements for the period ended April 30, 2020, as publicly filed on Sedar at www.sedar.com.

The Company prepared the unaudited financial statements and note disclosures for the six months ended April 30, 2020 in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). This MD&A complements and supplements, but does not form part of the Company's unaudited financial statements.

All dollar amounts contained herein are expressed in Canadian dollars unless otherwise stated.

Cautionary Note to Investors Concerning Forward-looking Statements

Forward-looking statements look into the future and provide an opinion as to the effect of certain events and trends on the business. Forward-looking statements may include words such as plans, intends, anticipates, should, estimates, expects, believes, indicates, suggests and similar expressions.

This MD&A contains forward-looking statements that are based on the Company's expectations, estimates and projections regarding its business, and the economic environment in which it operates. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to control or predict. Examples of specific risks associated with the operations of the Company are set out under Risk Factors. Actual outcomes and results may differ materially from those expressed in these forward-looking statements and readers should not place undue reliance on such statements.

All forward-looking statements have been made subject to risk factors summarized on page 9 of this MD&A.

This MD&A has been prepared using information as of June 26, 2020 and approved by the Board on June 26, 2020.

1.1 BUSINESS OVERVIEW

Prosper Gold is an exploration and development company focused on acquiring and advancing mineral prospects in British Columbia and Ontario.

PROJECTS

GALAHAD, WYDEE & MATACHEWAN PROJECTS

Wydee & Galahad

In 2016 Prosper entered into a definitive agreement to acquire the option to earn a 90% interest in the extensive land position surrounding the Ashley Gold Mine and Young Davidson Mine Area in the Cadillac Larder Lake Fault Area in Ontario. In addition, Prosper Gold also acquired a 100% interest in 13 mineral claims and 9 mineral leases contiguous to the optioned ground (the Galahad).

3,794.5m were drilled in 7 holes at the Galahad to test the Galer Fault, a steeply dipping deep crustal break. The Galer Fault contains slices of ultramafic rocks, syenite and green carbonate (fuchsite mariposite bearing ferrocarbonate), classic host rocks and alteration seen at many Timmins and Kirkland Lake gold deposits.

Matachewan

In 2019 seven diamond drill holes totaling 2,111 meters were drilled, logged, and sampled by Prosper Gold at the Middleton target. Drilling was on the immediate northwest side of the Cadillac-Larder Lake Break (CLLB) and highway 66, in an area underlain by pink to red syenite and massive dark green basalt. Drilling focused where historic work outlines anomalous gold-silver-copper mineralization. It was designed to test the known mineralized zone to confirm historic work. No drilling was done to test beyond the known area laterally or to depth.

New results confirm the older data and augment them. Together they define a robust mineralized system 300m by 200m and about 250 m deep with widely distributed gold-silver-copper values. Mineralization is largely hosted in the altered red syenite.

THE STAR

The Star Project is an alkalic porphyry copper-gold prospect in northwest BC. Prosper Gold holds a 51% majority interest in the Star Project joint venture pursuant to the Joint Venture Agreement dated September 2, 2016 between the Company and Firesteel Resources Inc.

1.3 SELECTED ANNUAL FINANCIAL INFORMATION

Not required for interim MD&A.

1.4 SUMMARY OF QUARTERLY INFORMATION

The following is selected financial information for the Company's most recent eight quarters ended April 30, 2020:

Quarter ended	Total revenue	Net loss and comprehensive loss	Net loss per share (basic and diluted)	Total assets
	\$	\$	\$	\$
Q2/20 ó April 30, 2020	-	(233,796)	(0.003)	1,042,813
Q1/20 ó January 31, 2020	-	(115,963)	(0.002)	1,273,437
Q4/19 ó October 31, 2019	-	(91,044)	(0.001)	1,415,904
Q3/19 ó July 31, 2019	-	(146,053)	(0.002)	950,712
Q2/19 ó April 30, 2019	-	(324,054)	(0.005)	999,775
Q1/19 ó January 31, 2019	-	(420,492)	(0.007)	1,242,286
Q4/18 ó October 31, 2018	-	(231,356)	(0.004)	1,016,161
Q3/18 ó July 31, 2018	-	(236,490)	(0.004)	1,143,155

The increase in net loss for the first quarter of 2019 is due to the increase in drilling activities at the Currie Property in Ontario.

The increase in total assets is due to the completion of two private placements during the first quarter of 2019, offset by the continuation of the use of cash for expenses incurred for the drilling program at the Ontario Property.

The Company continues to incur a decrease in net loss and comprehensive loss and total assets in the second and third quarters of 2019 due to the decrease in exploration activities for both periods. The total assets also decrease at the end of these two quarters due to the use of cash for general operation expense.

During the last quarter of the 2019 fiscal year, the Company wrote off mineral property acquisition costs of \$87,895 for the Egan and Currie properties. The Company also wrote off \$161,250 in geological consultant fees for the VP of Explorations and \$301,250 in management fees for the CEO, CFO and the VP of Explorations.

The increase in total assets during the last quarter of 2019 is due to the completion of a private placement for \$1,000,000.

During the first quarter of 2020, the increase in net loss compared to the last quarter of 2019 is due to the increase in travel and accommodation expenses for the CEO and the COO for their attendance in conferences. The total assets also decreased due to the usage of cash for the Company's exploration activities and operations.

During the second quarter of 2020, the increase in net loss compared to the first quarter of 2020 is due to the drilling activities during the quarter. The total assets continue to decrease due to the usage of funds for the exploration and operation activities.

1.5 RESULTS OF OPERATIONS

The Company recorded a net loss and comprehensive loss of \$349,761 and \$744,547 for the 6 months ended April 30, 2020 and April 30, 2019 respectively. The decrease in net loss in the current six months ended April 30, 2020 compared to the six months ended April 30, 2019 is due to the decrease in exploration activities and no management fees accrued for the CEO and the VP of Explorations. During the three months period ended January 31, 2020, the Company paid \$30,571 to the Matachewan First Nations to satisfy the Memorandum of Understanding that was agreed by Alexandria Minerals Corporation, the optionor.

The following table provides a breakdown of exploration expenditures on the Ontario Projects incurred during the three months period ended April 30, 2020:

	Three months ended April 30, 2020	Accumulated-to-date – April 30, 2020
Airborne survey	\$ -	\$ 395,500
Assay and analysis	6,985	558,198
Camp accommodations	-	110,706
Drilling	96,361	1,886,927
Equipment rentals	-	61,911
Field costs	4,574	242,881
Geological	7,900	443,978
Property rentals	4,514	162,619
Salaries and benefits	22,362	862,801
Staking	-	61,273
Transportation and freight	1,460	60,257
Travel and accommodations	-	78,283
Total	\$ 144,156	\$ 4,925,334

The Company began exploration on the Ontario Projects during May 2016. The airborne survey and soil sampling were completed in July 2016 and the drilling program began shortly thereafter. Field costs include salaries paid to geo-techs, rental costs for accommodations for camp personnel, camp food and supplies and management fees paid to the camp manager. Geological costs include fees paid to geological consultants. Transportation and freight costs include the fuel costs for vehicles and courier charges to camp. Travel and accommodation costs include travel, meals and accommodation costs for management personnel to be on location.

Overall, there were minimal exploration expenditures for the Star Property for six months period ended April 30, 2020 due to no drilling programs conducted during these periods. The expenditures for the six months period ended April 30, 2020 consist of \$1,200 for storage of equipment and \$3,600 for geological reports.

The following table provides a breakdown of general administration costs incurred during the six months ended April 30, 2020 and 2019:

General administration costs:	Six months ended April 30, 2020	Six months ended April 30, 2019
General and administrative	\$ 75,973	\$ 64,910
Management salaries and fees	36,675	27,668
Professional fees	22,670	11,598
Transfer agent, listing and filing fees	7,495	6,544
	\$ 142,813	\$ 110,720

General and administrative expenses include administrative salaries, advertising and promotion, amortization of equipment, courier and office expenses, insurance for directors and officers and commercial liability, annual general meeting, rental, and travel and meals expenses.

Management salaries and fees consist of salary to the Chief Operating Officer, the Chief Executive Officer, Chief Financial Officer and the VP of Explorations. For the six months period ended April 30, 2020, management salaries and fees were paid only to the CFO and COO. No management fees were paid to the CEO and the VP of Explorations.

1.6 LIQUIDITY

The Company's main source of funding has been the issuance of equity securities for cash through private placements. The Company's continuing operations are dependent on the ability of the Company to obtain the necessary financing to continue to explore the Ontario Projects, the Star Project and any future projects, the existence of economically recoverable mineral reserves from each project and the proceeds of dispositions of its mineral interests.

During the six months period ended April 30, 2020, cash flow used for operating activities was \$365,687 mainly due to exploration costs for the Ontario Projects, and general and administrative costs including salaries. Management has estimated that the Company will continue to incur expenditures of \$250,000 per month for the months when the Company's drilling program is in effect and \$75,000 per month during the months where no drilling is conducted.

At April 30, 2020, the Company had cash of \$124,643 which will not be sufficient to meet current liabilities of \$158,540 due within one year. The working capital of the Company at April 30, 2020 is \$8,785.

Additional debt or equity financing will be required to fund additional exploration programs. The Company has a reasonable expectation that additional funds will be available to meet ongoing and future exploration costs. However, there can be no assurance that the Company will continue to obtain additional financial resources on terms suitable to the Company.

General market conditions for junior resource companies have deteriorated and have resulted in depressed equity prices for resource companies, despite fluctuations in commodity prices. Although the Company was able to successfully complete the three private placements for the current year, the deterioration in market conditions could potentially increase the cost of obtaining

capital or limit the availability of funds in the future. Accordingly, management is actively monitoring the effects of the current economic and financing conditions on the Company and reviewing discretionary spending, capital projects and operating expenditures, and implementing appropriate cash management strategies.

1.7 CAPITAL RESOURCES

On November 29, 2018, the Company completed a private placement of \$250,000 for the issuance of 2,500,000 units at \$0.10 per unit. Each unit contains one common share and one share purchase warrant for one common share at \$0.15 expiring in 24 months. A portion of the proceeds from the unit private placement has been allocated to reserves for the warrants in the private placement units based on the market price of the share used for the issuance. Share issue costs of \$5,377 were incurred.

On December 17, 2018, the Company completed a non-brokered private placement of \$350,000 through the issuance of 2,916,667 units of flow-through shares at a price of \$0.12 per unit. Each flow-through unit consists of one common share and one half of one non-transferable non-flow through common share purchase warrants. Each non-flow through warrant entitles the holder to purchase one common share at an exercise price of \$0.17 per a period of 24 months from the closing date. Finder's fees totaling \$16,500 in cash were paid and 137,500 common share purchase warrants were issued. Each Finder's warrant is non-transferable and exercisable for one common share at \$0.17 for a period of 24 months from the closing date. A portion of the proceeds from the flow-through unit private placement has been allocated to reserves for the one-half warrants in the flow-through private placement units based on the market price of the Company's share used for the issuance. A recovery of a flow-through premium liability of \$8,167 has been recognized as income from the flow-through shares premium. Additional share issue costs for legal and filing fees of \$12,630 were incurred. The \$350,000 of flow-through financing has been spent on qualified expenditures during the 2019 fiscal year.

On September 9, 2019, the Company completed a non-brokered private placement for \$1,000,000 for 20,000,000 units at price of \$0.05. Each unit consists of one common share and one share purchase warrant with an exercise price of \$0.08 and expires 24 months from the closing date of the private placement. Broker fees in connection with the private placement consist of 480,000 warrants valued at \$17,280 and cash payment of \$24,000. Additional legal, transfer agent and filing fees totaled \$16,885.

At April 30, 2020, there were no externally imposed capital requirements to which the Company is subject and with which the Company has not complied.

The Company's capital consists of items in shareholders' equity of \$884,273 as at April 30, 2020 compared to \$1,192,159 as at October 31, 2019. The decrease is due to the net loss of \$349,761 for the six months period ended April 30, 2020, offset by \$34,952 for share-based payments.

1.8 OFF-BALANCE SHEET ARRANGEMENTS

None.

1.9 TRANSACTIONS BETWEEN RELATED PARTIES

The Company's related parties consist of its key management personnel, including its directors and entities controlled by key management personnel. During the normal course of business, the Company enters into transactions with its related parties that are considered to be arm's length transactions and made at normal market prices and on normal commercial terms.

- a) Key management compensation includes \$61,675 and share-based payments totaled \$31,793 for the six months ended April 30, 2020.
- b) At April 30, 2020, accounts payable and accrued liabilities include \$131,250 due to the Company owned by the VP of Explorations. In addition, \$3,462 is due to COO for accrued salary.

1.10 PROPOSED TRANSACTIONS

There are no proposed assets or business acquisitions or dispositions before the board of directors for consideration.

1.11 CRITICAL ACCOUNTING ESTIMATES

There have been no changes in critical accounting estimates for the six months period ended April 30, 2020. Refer to Note 2 of the audited financial statements for the year ended October 31, 2019.

1.12 CHANGES IN ACCOUNTING POLICIES

There have been no changes in accounting policies for the six months ended April 30, 2020 for the Company.

The following is the accounting standard that is effective beginning in current period:

IFRS 16 *Leases*

This new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both the lessee and the lessor. The new standard introduces a single lessee accounting model that requires the recognition of all assets and liabilities arising from a lease.

The main features of the new standard are as follows:

- An entity identifies as a lease a contract that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

- A lessee recognizes an asset representing the right to use the leased asset, and a liability for its obligation to make lease payments. Exceptions are permitted for short-term leases and leases of low-value assets.
- A lease asset is initially measured at cost, and is then depreciated similarly to property, plant and equipment. A lease liability is initially measured at the present value of the unpaid lease payments.
- A lessee presents interest expense on a lease liability separately from depreciation of a lease asset in the statement of profit or loss and other comprehensive income.
- A lessor continues to classify its leases as operating leases or finance leases, and to account for them accordingly.
- A lessor provides enhanced disclosures about its risk exposure, particularly exposure to residual-value risk.

The new standard supersedes the requirements in IAS 17 *Leases*, IFRIC 4 *Determining whether an Arrangement contains a Lease*, SIC-15 *Operating Leases – Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*.

The Company has assessed the impact of the application of IFRS 16 on the Company's financial statements and determined that there will be no adjustments required due to no existing long-term leases for the Company.

1.13 FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The Company's financial instruments consist of cash, amounts receivable other than GST receivable, deposit, reclamation deposit and accounts payable and accrued liabilities. The Company's cash, amounts receivable other than GST receivable and deposit are classified as loans and receivables. The Company's reclamation deposit is classified as held-to-maturity. The Company's accounts payable and accrued liabilities are classified as other financial liabilities. The fair values of the Company's cash, amounts receivable other than GST receivable, deposit and accounts payable and accrued liabilities approximate the carrying amounts due to the short-term maturities of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, interest rate risk and foreign currency risk.

The Company considers its exposure to credit risk to be low as its cash, deposit and its reclamation deposit are held with a large financial institution with a strong credit rating.

The Company manages liquidity risk by maintaining adequate cash and managing its capital. At April 30, 2020, the Company had accounts payable and accrued liabilities of \$158,540 due within one year, and cash of \$124,643.

Floating interest earned on the Company's cash balances are considered to be at market interest rate. The deposit earns no interest and was held as a deposit for the Company's corporate credit card. The reclamation deposit earns interest of 0.25%. Assuming that all variables remain

constant, a change representing a 1% increase or decrease in interest rate would not have a significant effect for the Company.

The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities are denominated in foreign currency. At April 30, 2020, the Company's monetary assets and liabilities are primarily denominated in Canadian dollars.

1.14 OTHER MD&A REQUIREMENTS

a) Disclosure of Outstanding Share Data

	<u>Number Outstanding</u>
At the date of this MD&A	
Common Shares	80,558,916
Stock Options	5,100,000
Warrants	24,575,833

b) Limitations of Controls and Procedures

The Company's management, including its Chief Executive Officer and Chief Financial Officer, believe that any system of disclosure controls and procedures or internal control over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Furthermore, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty and breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

1.15 RISK FACTORS

The risk factors associated with the principal business of the Company are outlined in details in the Company's MD&A for the year ended October 31, 2019. Due to the nature of the Company's business and the present stage of exploration of the Property, an investment in the securities of the Company is highly speculative and subject to a number of risks. Briefly, these include the highly speculative nature of the resources industry characterized by the requirement for large capital investments from an early stage and a very small probability of finding economic mineral deposits.

In addition to the general risks of mining, there are country-specific risks, including currency, political, social, permitting and legal risk. An investor should carefully consider the risks and the other information that the Company provides on its website or files on Sedar before investing in the Company's common shares, and should not consider an investment in the Company unless the investor is capable of sustaining an economic loss of the entire investment. The Company's actual exploration and operating results may be very different from those expected as at the date of this MD&A.

Since December 2019, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in a widespread health crisis that has affected economies and financial markets around the world resulting in an economic downturn. This outbreak may also cause staff shortages, reduced customer demand, increased government regulations or interventions, all of which may negatively impact the business, financial condition or results of operations of the Company. The duration and impact of the COVID-19 outbreak is unknown at this time and it is not possible to reliably estimate the length and severity of these developments
